

PA2000 SERIES

Cell Phone / Card Reader Entry Systems

Platinum PA2000 series cell phone / card reader entry systems is designed with the state of the art technology for residential or light commercial applications. All 3 entry functions (phone entry, key entry and RFID card entry) are built in a compact heavy duty metal box. With free Platinum Phone Book Manager software, user information can be edited on PC and uploaded to the unit via USB drive. The text message control capability makes it easy to modify the user information, schedule gate operations and control gate remotely. PA2000 series integrates AC, battery and solar panel power sources. With solar panel installed, PA2020 / PA2022 are able to work at AC power free sites.
